

DSG

SAND, GRAVEL & GRASS SPACER

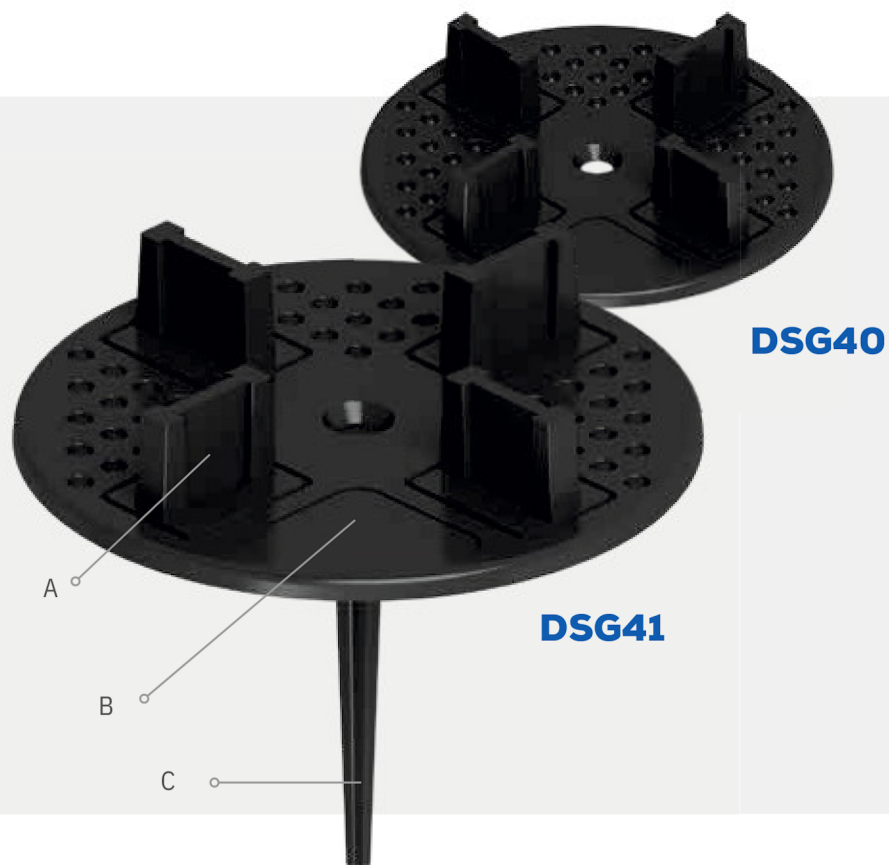

THE INSTALLATION SYSTEM WITH THE DSG SPACER IS THE SIMPLEST AND QUICKEST WAY OF CREATING FLOORING DIRECTLY ON SAND, GRAVEL OR GRASS.

DSG spacers are special supports you can use directly on the ground. Perfect for use directly on sand, gravel and grass, they raise the flooring from the installation surface and create joints between the tiles.

They are available with 4 mm thick tabs and the DSG41 version features an anchoring tip for greater strength even in soft soil.

What makes up the DSG?

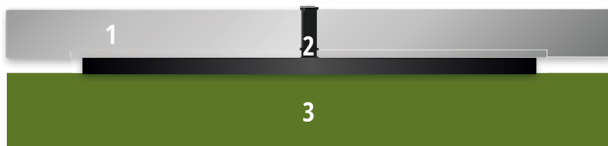

- A.** 4mm tabs that can be easily removed.
- B.** 4 quadrants to hold tile firmly in place and maintain alignment.
- C.** The anchoring tip on the DSG41 is made for strengthening stability when used on grass or soil.

SKU	Description	Pack.	Code
DSG40	DSG Spacer w/out anchoring tip	100	DSG40
DSG41	DSG Spacer w/ anchoring tip	100	DSG41

INSTALLATION EXAMPLES

1. Tiles
